

Wisdom

Clarity is the state of mind where awareness is present and a person can clearly see all the options before them without the unnecessary distraction of a noisy, cluttered mind.

This is the space that intuitively right decisions and actions are taken from. It is the space that the visionaries and great minds operate from. It is from this space that we operate with intuitive wisdom rather than old programming.

When enough people operate from this space a world of cooperation and alignment will begin to unfold and the problems of mankind will begin to be resolved.

Without this clarity the madness of humanity would surely cause our self-destruction.

Deciding to live from wisdom yourself and practicing the skills necessary to do so is the most powerful contribution you can make to your own life and for the well-being of humanity.
